## ASIA SCIENCE DAY

Tuesday, 21 October 2014  
University of Zurich, Main Building

Asia continues to redefine the business strategies of companies, large and small alike. With fast growing economies, a focus towards innovation and technology, and the largest urban areas in the world, Asia will continue to be of central importance for anyone involved in international activities in Education, Research and Innovation.

You are invited to an interactive session focusing on Swiss-Asian research. Learn about funding opportunities, discuss current trends with Asian-based Swiss science counselors and swissnex directors and listen to first-hand experience from a recent Swiss-Asian research project. The session will focus on discussion and networking to make sure that you have the opportunity to connect with the relevant contact in South Korea, Japan, China, India and Singapore to share your questions or ideas for collaboration.

### Registration

Please register online by 11 October 2014
